

## **Narrative for Vocational Revolving Fund Account**

**Culinary Arts-Checkers Restaurant** is a student run restaurant with a chef as the instructor and one Para professional to supervise the commercial kitchen, students and restaurant. The revolving account is the revenue from the restaurant which is used to purchase equipment, supplies, and food for the program to keep it current with industry standards. Due to the increase in food cost there is a minimal amount in the culinary arts account.

**Bronco Barn-The School Store** is a marketing lab class with daily sales of school supplies, t-shirt, drinks, and cards. The students research, market, order, and inventory the items sold in the school store. The revenues from the store have updated the technology in the Wilbur H. Palmer Vocational and Technical Center's computer labs, equipment, chairs, tables, and supplies in the business department classes. The current balance will build throughout the school year.

**Building Trades-The Building Trades Revolving Account** is used for the purchase of lumber, materials, equipment, and tools needed for the construction of sheds, gazebos and a three bedroom house. The account for this program area is depleted at this time because the house is at the completion point and historically was sold at this time for the market value of a modular home without the land. We are developing a plan to place the house on a foundation and sold on a town owned lot. The house on a lot with a garage will increase the revenue for the future development and planning of larger construction projects.

**Adult Education-Night School Classes** and Spanish for children have more in the account due to the increase in tuition last semester. The adult education classes are being expanded this year to several classes in the Vocational Center.

**Child Care-The Child Care Revolving Account** is funded with the tuition of the three and four year olds attending the Little Broncos Preschool. The account pays for the salary of one Para professional who is the teacher for the Preschool students and the high school students who are working in the preschool.
